

Packraft Container India Pvt Ltd. started its operations in the year 1996 as a small partnership concern. From then on, there was no looking back. Expanding on sheer hard work and commitment to quality, today PCI boasts of a robust infrastructure to meet on-demand requirements of our clients.

We are equipped to manufacture, furnish and supply for the packing needs of a variety of industries. With consistent adherence to quality standards and untiring efforts to improve, we boast of a high competitive advantage over competitors which has time and again been testified by our growing customer base and long lasting relationships with our clients. To address the needs of packaging in the near future, we have now strategically entered into a new world of specialized packaging products.

With SAFEPACK range of 'green' products we intend to contribute as one of the forward thinking and fastest growing environment friendly packing material manufacturer.

Rigorous step by step Quality checks to ensure optimum performance and reliability.

- \* Prevents damage to packages during handling, storage and transit.
- \* When installed at four corners of corrugated boxes, it results in increased compression strength, enabling higher stacking during storage and transit, Saving of Space and Cost.
- \* Vertical Protection of Palletized Packages.
- \* Production of Protection Frames for innumerable items.
- \* Wrap around flexible edge protectors for inside and outside of reeled products like Paper Reels, Flexible Films, Soft Metal Rolls Laminates and other Reeled goods.
- \* Strengthening of large boxes by fixing on all sides.
- \* It is a Green Product and is an Ideal Packing material for Exporting Goods to all corners of the world.

\* Edge-Protectors or Angle-Protectors give substantial saving in packing time and result in superior looks of packed products.

\* Supplied in different widths and thicknesses according to customers' specifications.

Recyclable.

Biodegradable.

Environment Friendly.

Low cost compared to Wood.
