

# Slip Sheets

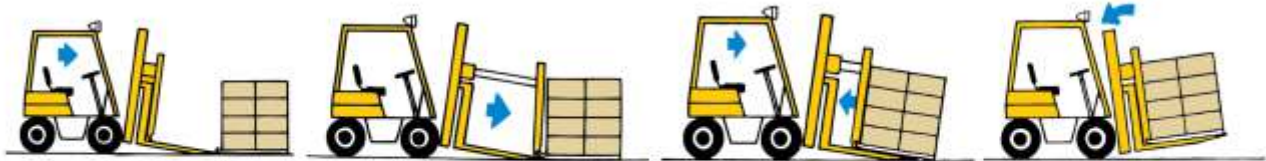

Save On:

- Materials
- Freight
- Handling
- Warehousing

packraft  
**SAFEPAK™**

Slip Sheets or transfer sheets are thin pallet sized sheets made of wet strengthened high-quality kraft liner and are mostly used in commercial shipping. These are a cost-saving, sustainable and recyclable replacement for wood pallets. The multi-laminated materials make them moisture resistant leading to almost zero wear and tear. Slip sheets prove to be an economical solution for packaging as it helps to save costs on warehousing, transportation, freight & handling. Being easily recyclable, these are

### Slip sheet loading procedure
